2024-2025 Math League Preliminary Round

(Grade 1)

(Unofficial version, for reference only)

The following description applies to the six following questions.

Look at the first three figures. They go together in some way. Choose one more figure in the rest of the row that goes with the first three figures in the same way. For example, the first three figures are the same figure rotated. So, the correct answer is (B).

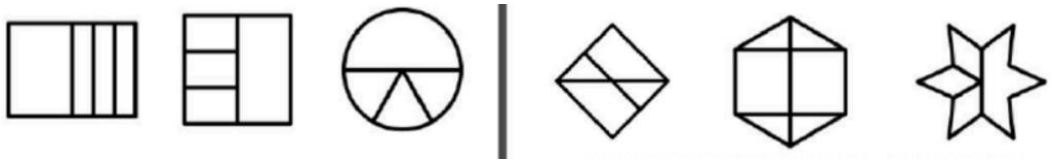

A **B** **C** **D**

Question 1:

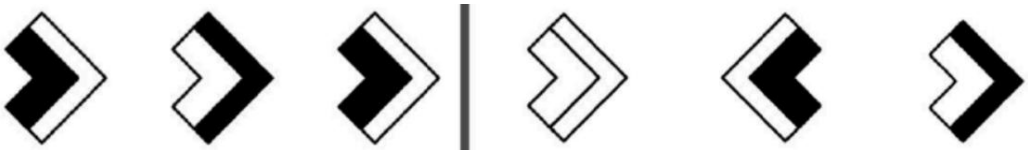

A **B** **C**

Question 2:

A **B** **C**

Question 3:

A **B** **C**

Question 4:

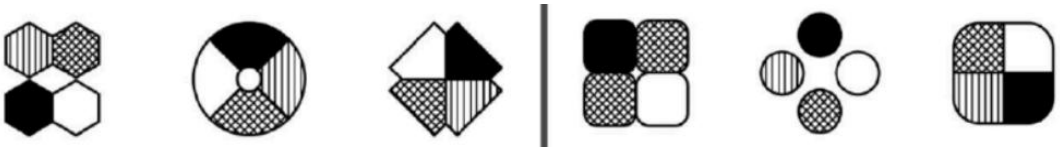

A **B** **C**

Question 5:

A **B** **C**

Question 6:

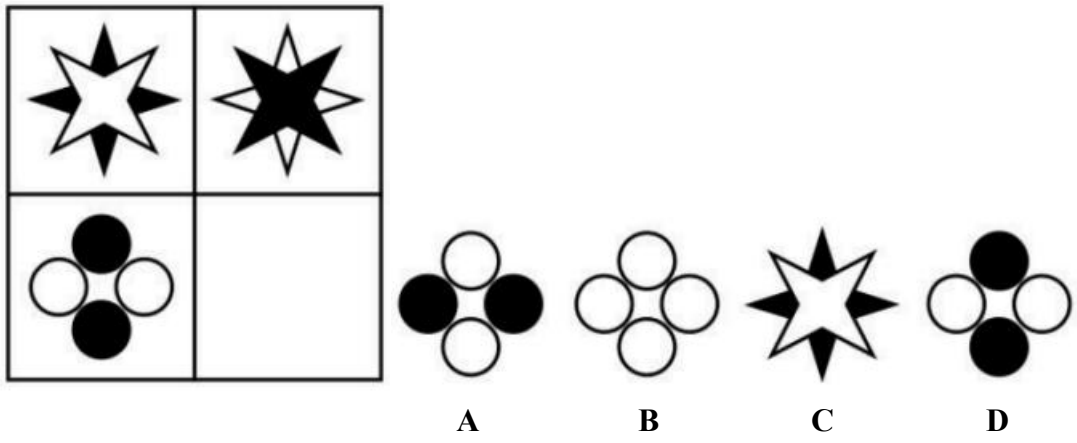

A **B** **C**

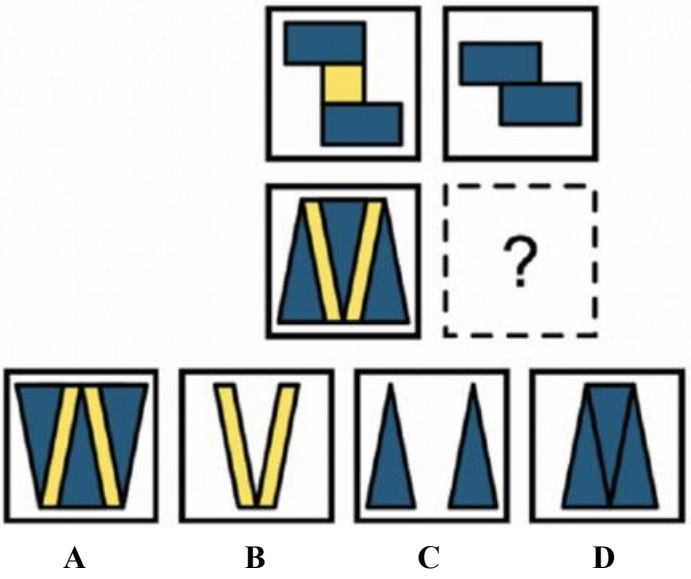

The following description applies to the nine following questions.

You are shown a pair of shapes on the top row that are related in some way. You must determine how they are related. Then, look at the shape in the bottom left box and find which answer goes with it to create the same relationship between the shapes in the top two boxes.

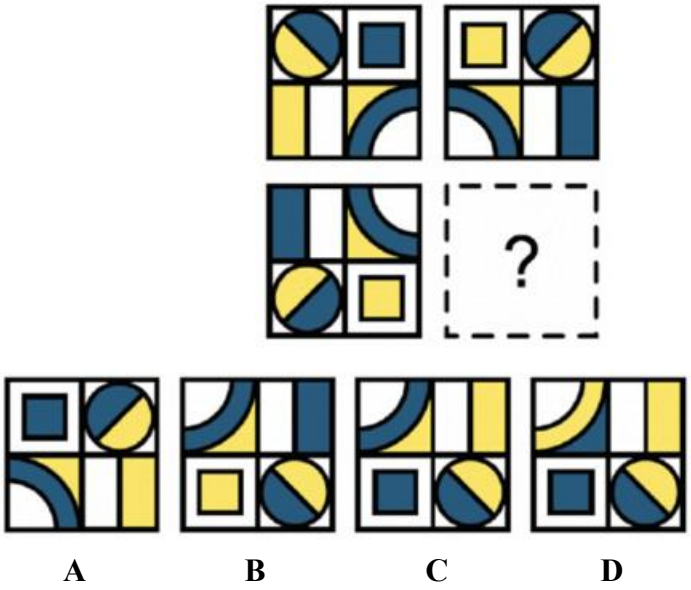

For example, in the figure below, the two shapes on the top row are opposite, meaning black becomes white and white becomes black. So the answer is (A) as the two shapes on the bottom row are also opposite.

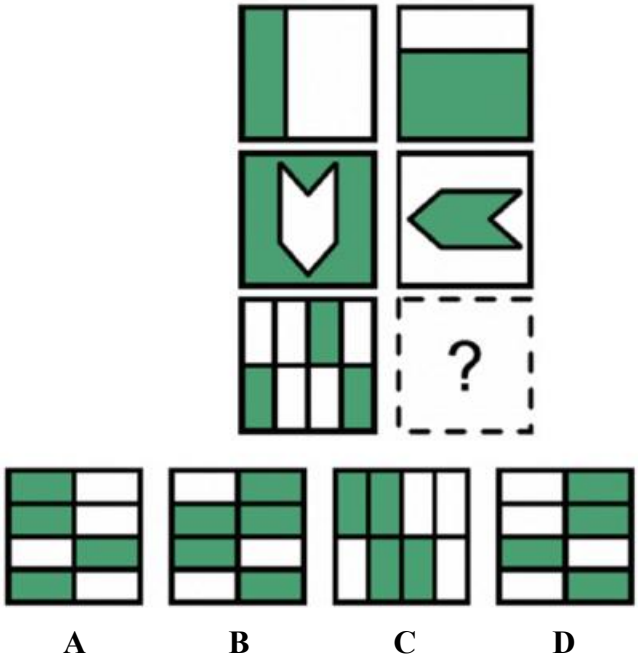

Question 7:

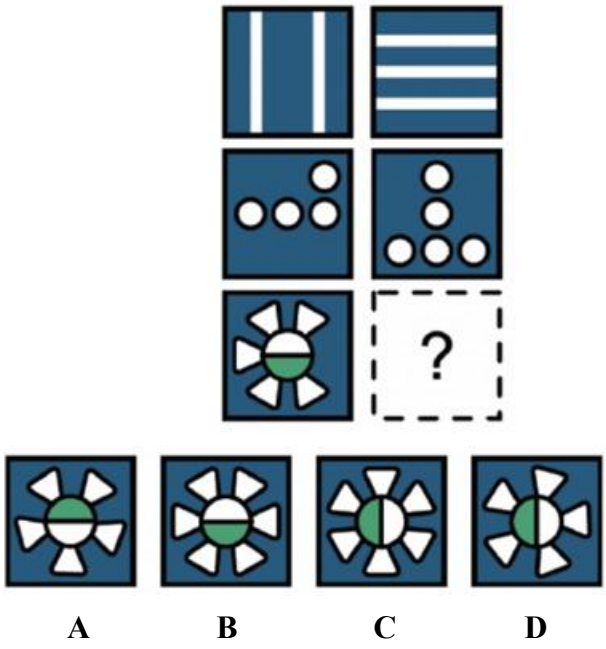

Question 8:

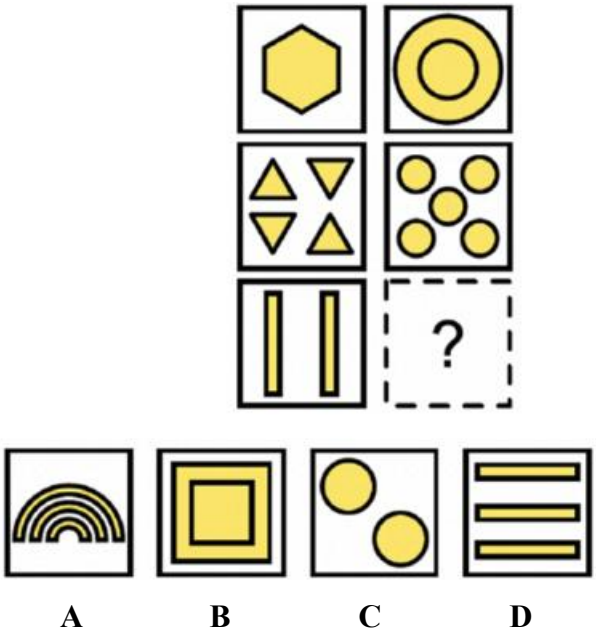

Question 9:

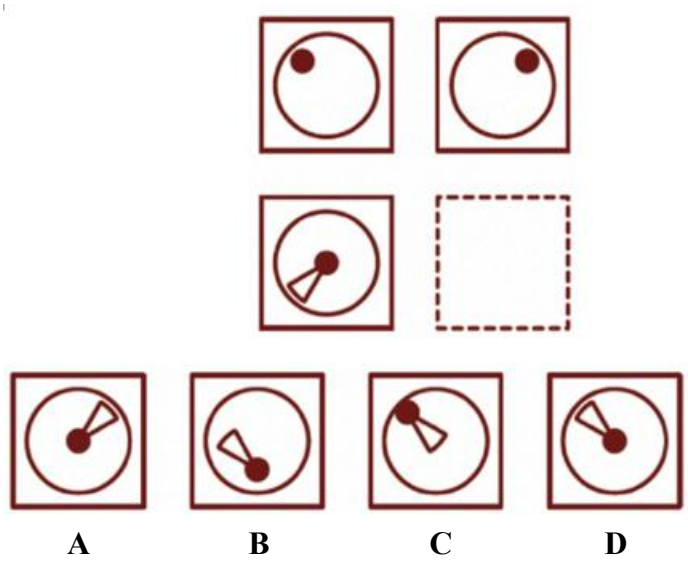

Question 10:

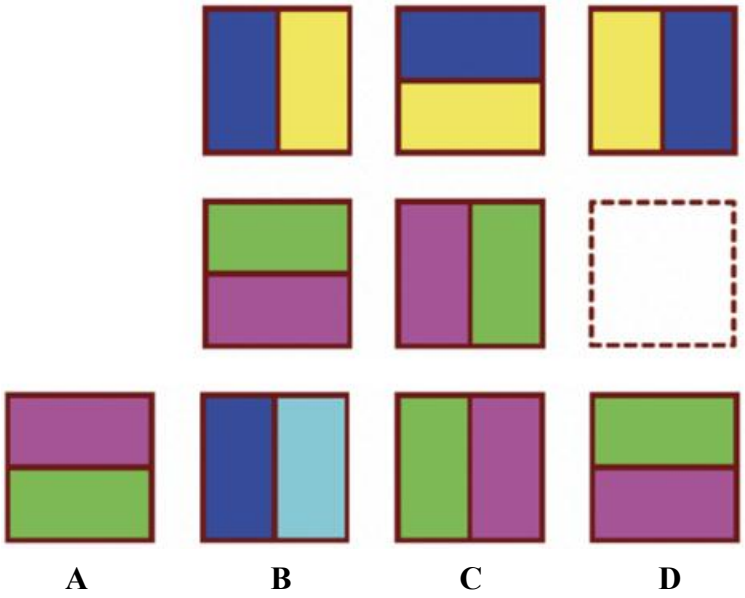

Question 11:

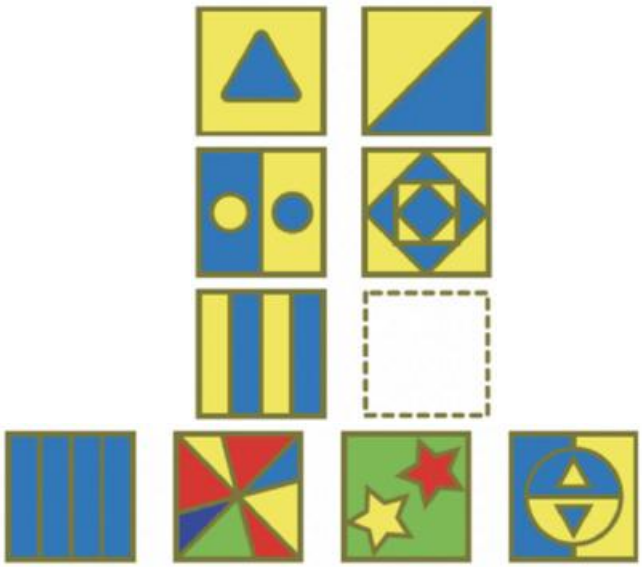

Question 12:

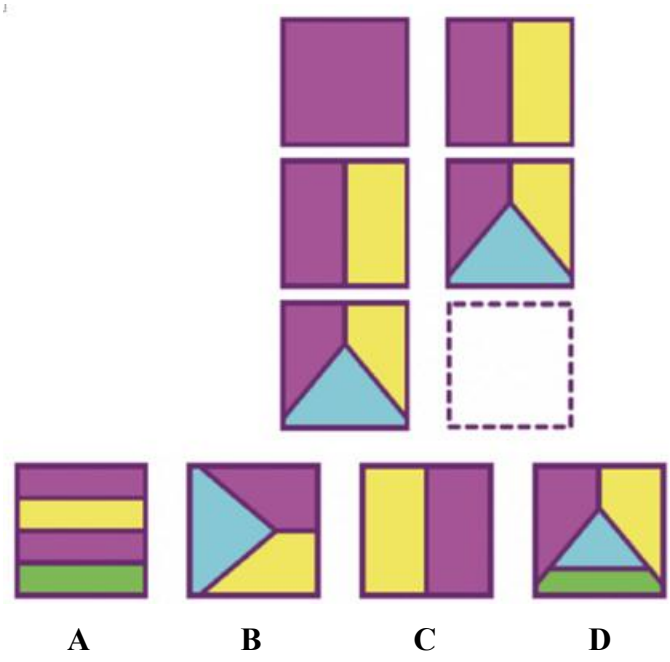

Question 13:

Question 14:

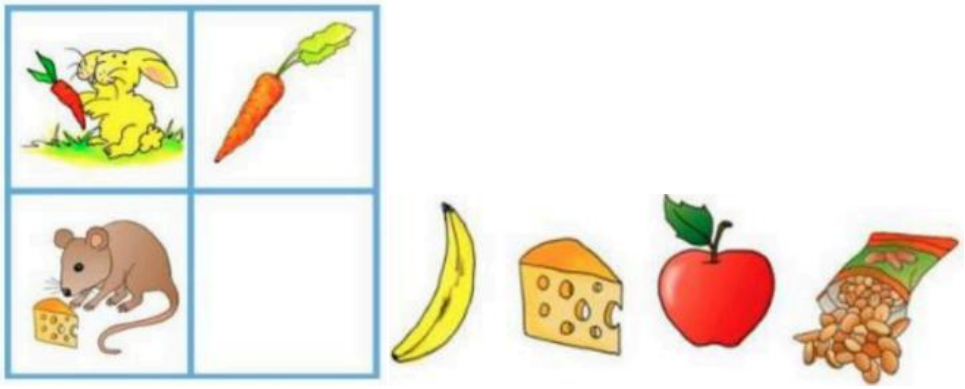

Question 15:

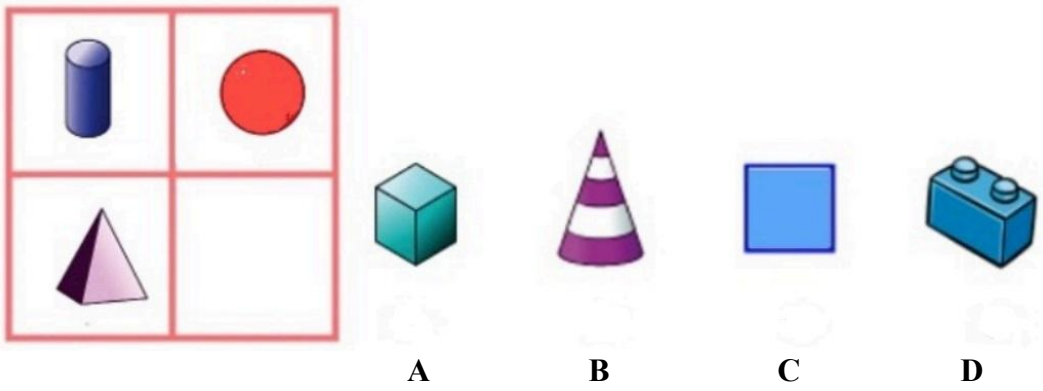

The following description applies to the six following questions.

Look at the two pictures on the top row. They go together in some way. Now, look at the picture in the bottom box, and then look at the answer choices. Do you see a picture among the answer choices that go with the picture on the bottom the same way the pictures on top go together?

For example, in the figure below, the answer is (B), as the food on the right is what the animal on the left eats.

Question 16:

Question 17:

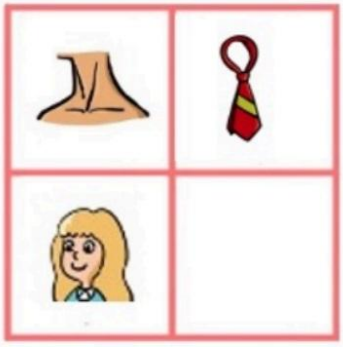

A **B** **C** **D**

Question 18:

A **B** **C** **D**

Question 19:

A **B** **C** **D**

Question 20:

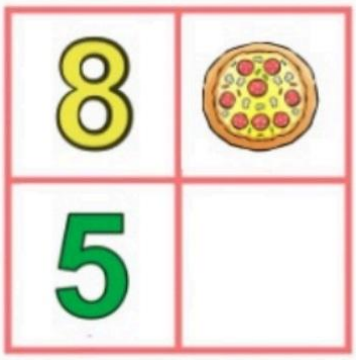

A **B** **C** **D**

Question 21:

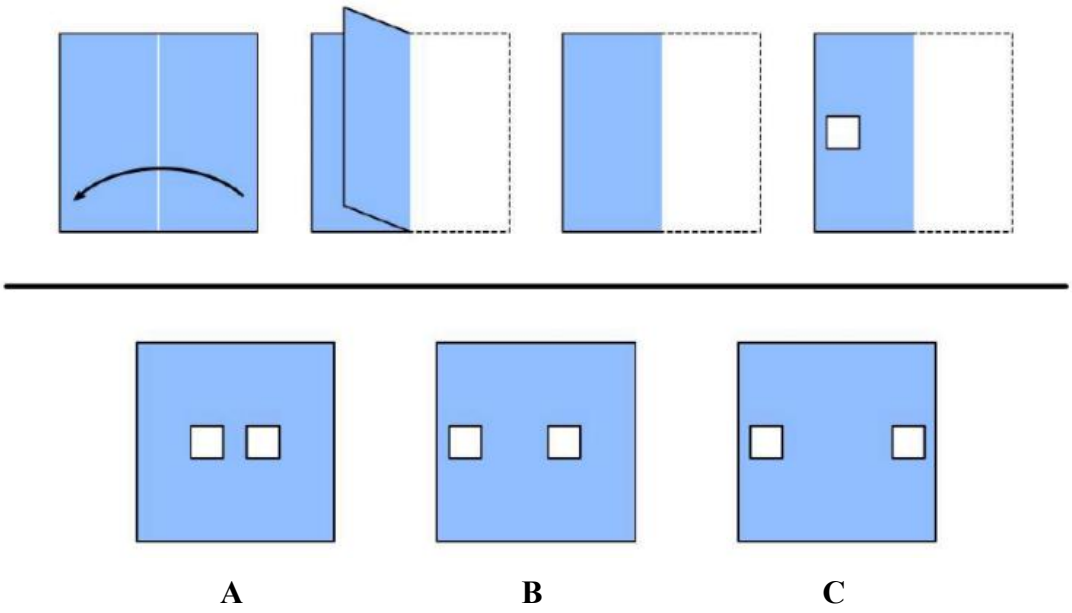

A **B** **C** **D**

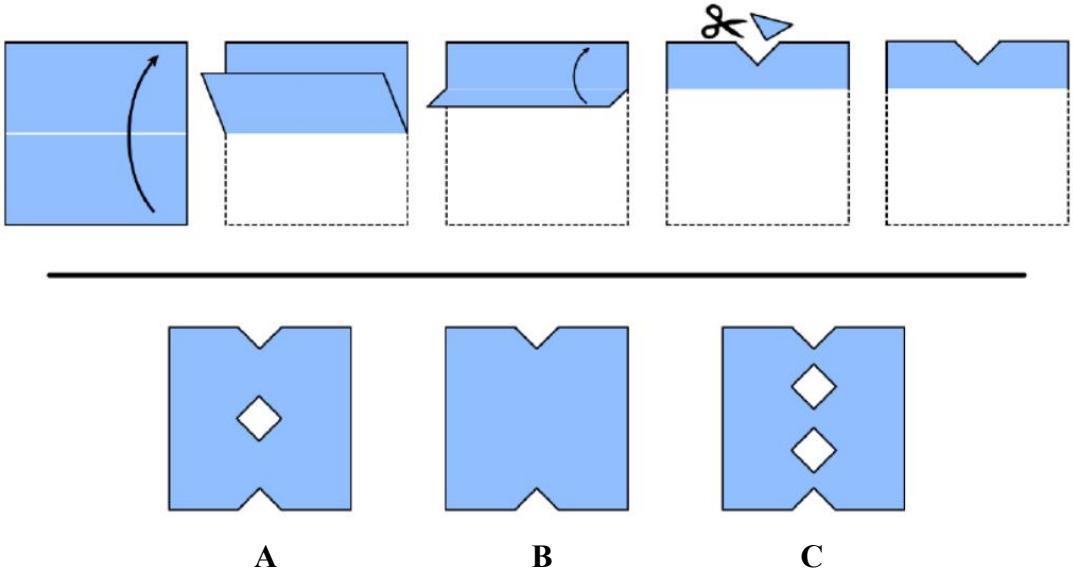

The following description applies to the six following questions.

Take a look at the pictures across the top row. They show a piece of square paper being folded. Then, one or more holes are punched in the folded piece of paper. Can you point to the answer that shows what the square piece of paper will look like when it is unfolded?

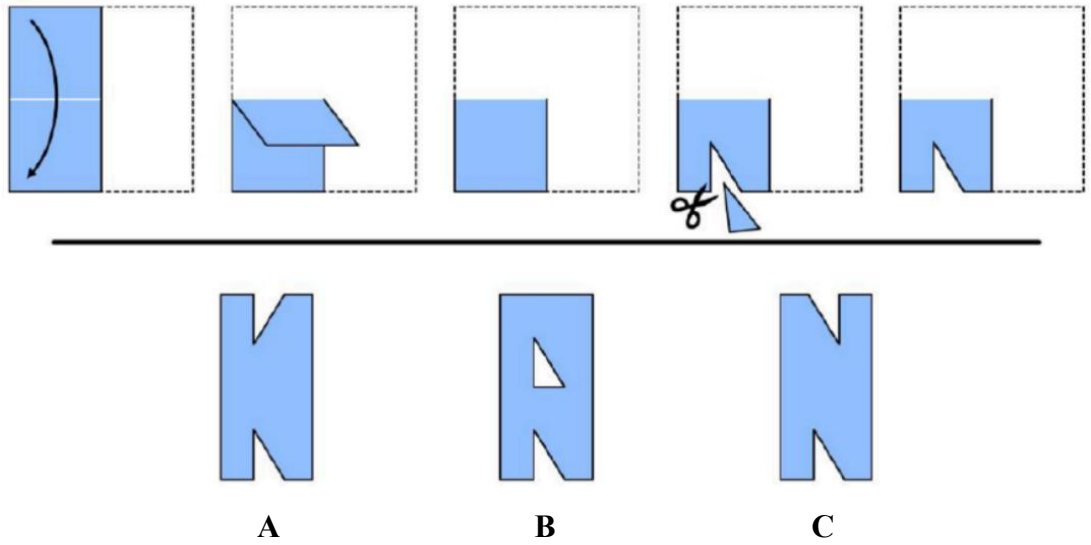

For example, in the figure below, the answer is (C).

Question 22:

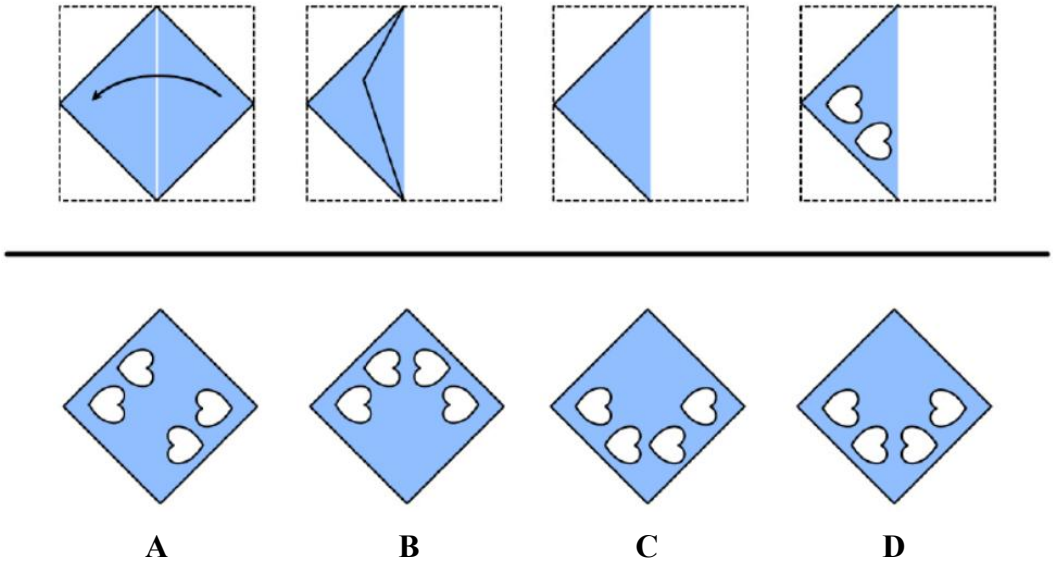

Question 23:

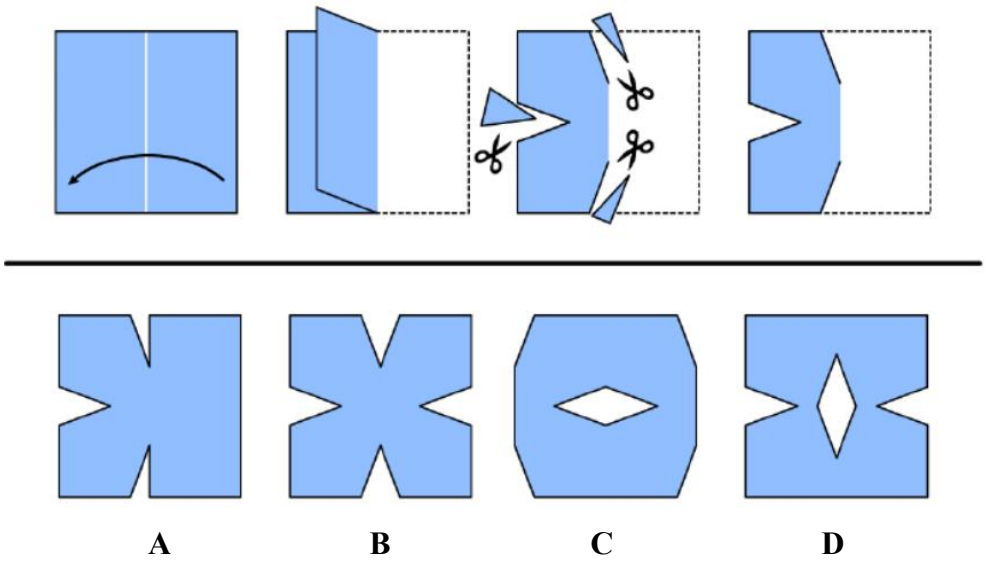

A **B** **C**

Question 24:

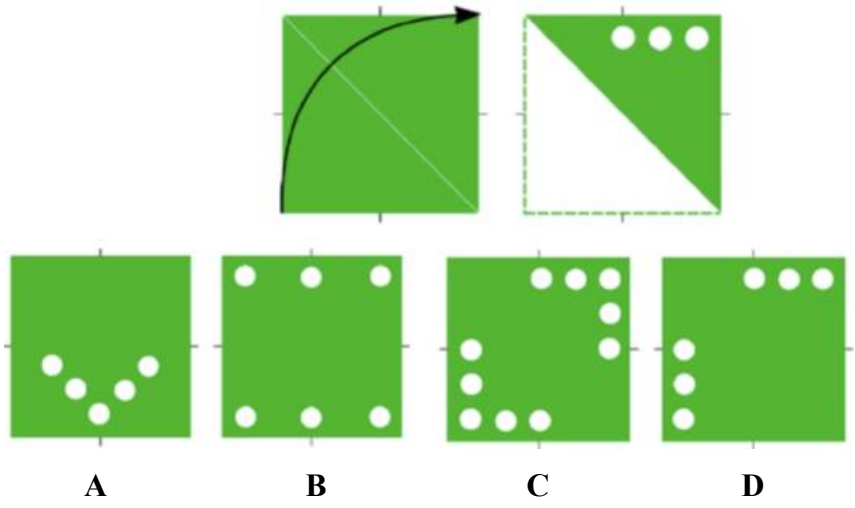

A **B** **C** **D**

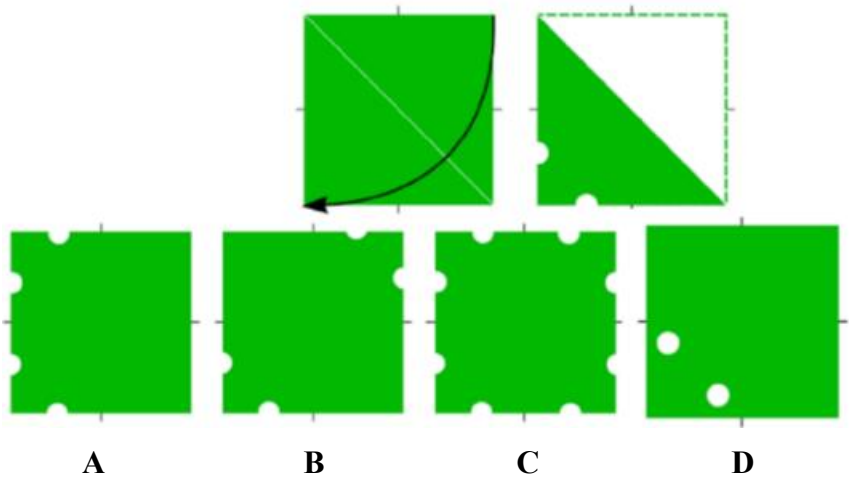

Question 25:

Question 26:

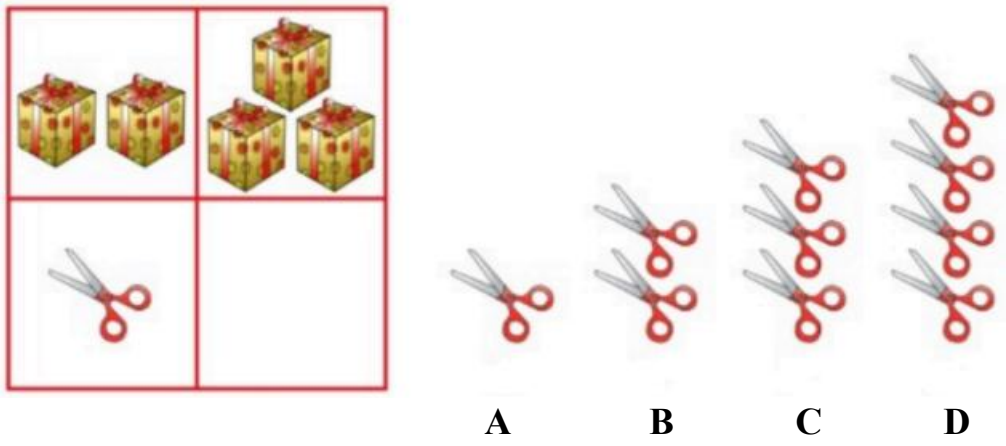

Question 27:

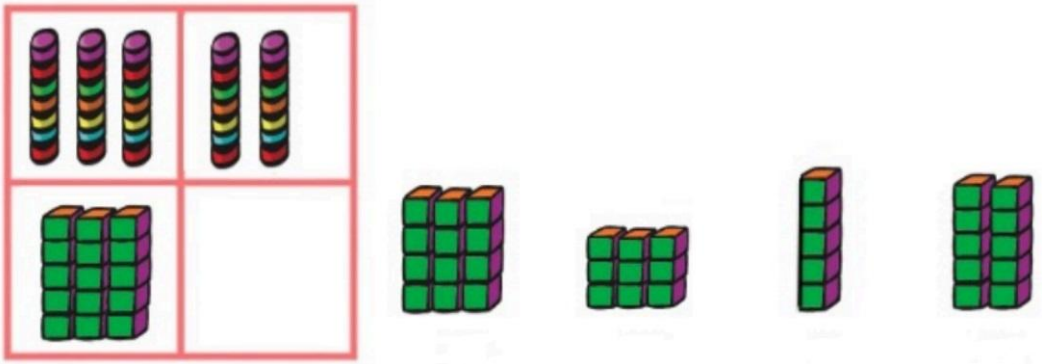

The following description applies to the six following questions.

Determine how the top two pictures are related. Figure out the rule they are following. Then, choose the picture from the possible answers that will have the same relationship with the picture on the bottom left.

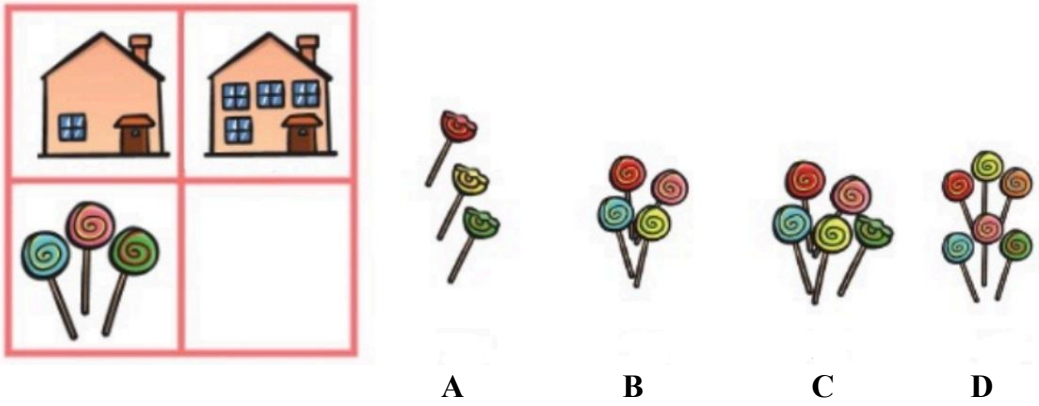

For example, in the figure below, look at the two pictures on top. They are related in some way to each other mathematically. The first box has 2 gifts. The second box has 3 gifts. 2 + 1 = 3. Now look at the first bottom box. There is one pair of scissors. Look at the answer choices. Do you see an answer that is related to the scissors in the same way the second box above is related to the first box above? The answer is (B). There is one more pair of scissors than you see in the bottom box, just like there was one more gift in the second box on the top than there was in the first box.

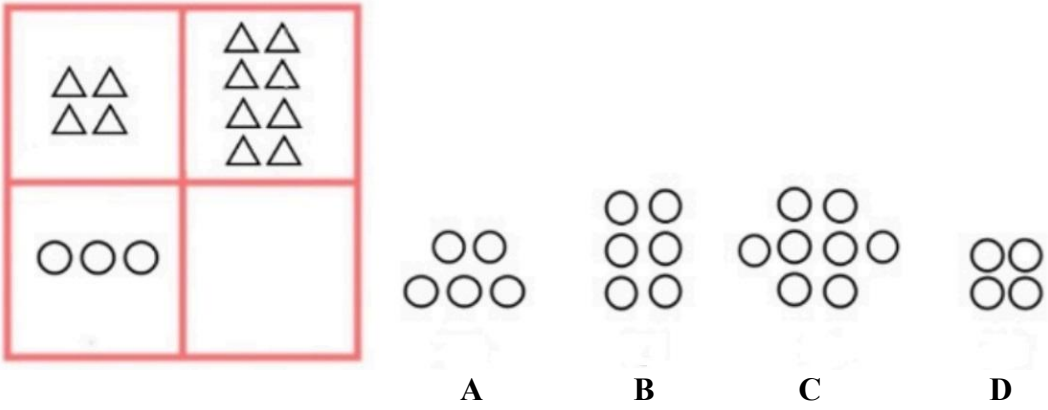

Question 28:

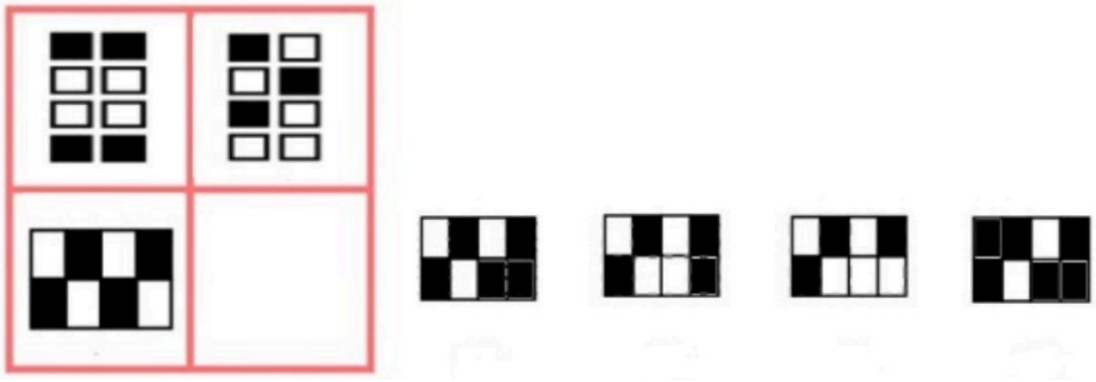

Question 29:

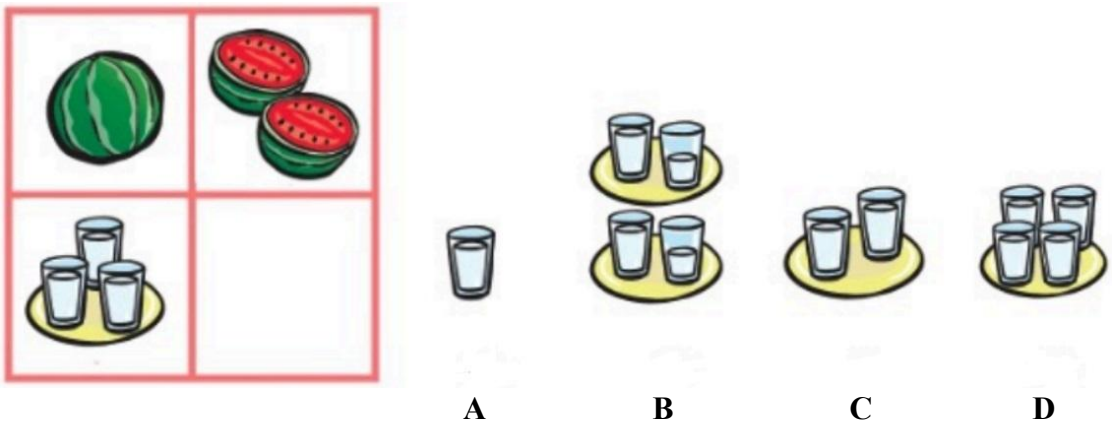

Question 30:

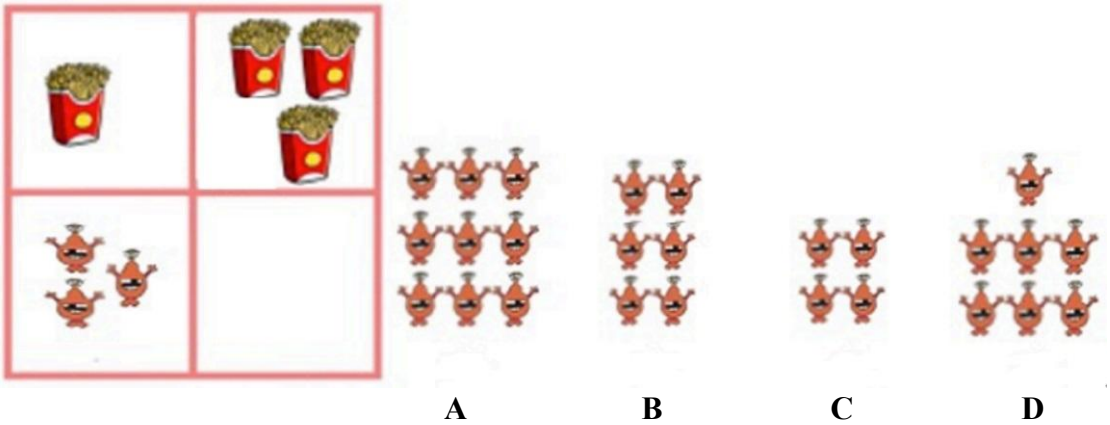

Question 31:

Question 32:

Question 33:

The following description applies to the six following questions.
Choose the number that comes next to continue the pattern or follow the rule.

1 4 7 10 13 ___

A) 14
B) 15
C) 16
D) 17

Look at the numbers. Do you see the pattern that they make? Each number is 3 more than the number before it. So, the rule is to add 3 to each number. Which number comes next in the series? 13 + 3 is 16, so (C) is the correct answer.

Question 34:

3 8 13 18 23 ___

A) 30
B) 27
C) 28
D) 29

Question 35:

5 6 4 5 3 ___

A) 3
B) 4
C) 5
D) 6

Question 36:

6 7 9 12 16 ___

A) 21
B) 22
C) 23
D) 24

Question 37:

6 12 18 24 ___ 36

A) 32

B) 34

C) 38

D) 30

Question 38:

4 8 6 10 8 ___

A) 11

B) 12

C) 13

D) 14

Question 39:

9 10 12 15 16 ___

A) 19

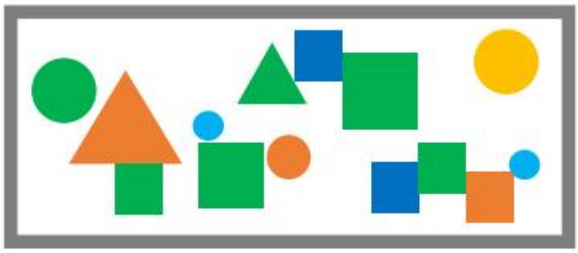

B) 17

C) 12

D) 18

Question 40:

In the picture below, there are only triangles, circles, and squares. How many more squares than circles are there in the drawing below?

A) 1

B) 2

C) 3

D) 4

Question 41:

Tom found six shells at the beach. Renata found twice as many. How many shells did Renata find?

A) 3
B) 6
C) 9
D) 12

Question 42:

Jake crossed out every third number on the list starting with 3. How many numbers did he cross out?

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

A) 3
B) 4
C) 5
D) 6

Question 43:

The following list of numbers follows a pattern. Three numbers are covered by a rabbit, a turtle, and a zebra. What is the sum of the numbers under these animals?

5	 rabbit	15	20	25
 turtle	35	40	 zebra	50

A) 70
B) 75
C) 80
D) 85

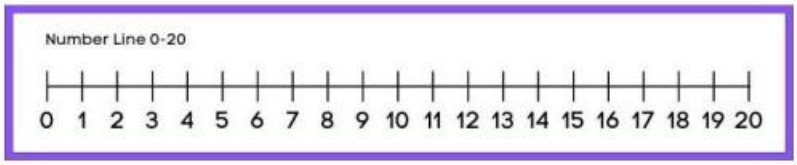

Question 44:

Elijah wrote the numbers from 1 to 15 in order without spaces: 12345678910….
What is the 15th digit that Elijah wrote?

A) 0
B) 1
C) 2
D) 3

Question 45:

Jerome's secret number is exactly in the middle of the numbers between 7 and 15. Find Jerome’s secret number.

A) 10
B) 11
C) 12
D) 13

Answers										
Question	1	2	3	4	5	6	7	8	9	10
